Banyan Line Little Kahuna Assembly Instructions:

1 - Main Assembly:

Assemble the four main panels (front, back and two sides). The side panels have threaded inserts so you do not need nuts for this. Align the front panel with one side and insert bolt through front panel into insert in side panel.

2 - Top:

The top section is composed of one piece. Bolt on in the same way as the other panels.

3 - Feeders:

Attach the feeder rings to the feeder doors. The bracket on the feeder ring is threaded so again you do not need nut. Place the short stubby bolt through the outside of the feeder door and place the feeder ring on the inside - the bolts will thread right into the bracket - then insert bowls.

4 - Casters:

Casters either bolt in or slip into the inserts in the legs (depending on the style you have).

5 - Misc.:

Grate and pan slide in on runners.

6 - Lock:

Install the lock with the piece with the handle on the door.

Enjoy your cage!
