Banyan Line Big Kahuna Assembly Instructions:

1 - Main Assembly:

Assemble the three main panels (front, back and outer side) for each compartment. The side panels have threaded inserts so you do not need nuts for this. Align the front panel with one side and insert bolt through front panel into insert in side panel. Attach open end of front and rear panels (inner side) to the divider frame - repeat for both compartments.

2- Top:

The top section is composed of two pieces - one for each compartment. They bolt on in the same way as the other panels.

3- Feeders:

Attach the feeder rings to the feeder doors. The bracket on the feeder ring is threaded so again you do not need nut. Place the short stubby bolt though the outside of the feeder door and place the feeder ring on the inside - the bolts will thread right into the bracket - then insert bowls.

4- Casters:

Casters either bolt in or slip into the inserts in the legs (depending on the style you have).

6 - Misc.:

Grate and pan slide in on runners. Divider slides into divider frame.

7 - Locks:

Install the locks with the piece with the handle on the door.

Enjoy your cage!
